

Product name OBINUTUZUMAB-Like
Labelled standard

Catalog number GAH92161

Product description

Labelled Obinutuzumab-like is a recombinant, stable isotope labelled monoclonal IgG1-Kappa antibody containing proteotypic peptides derived from Obinutuzumab's originator sequence. Labelled Obinutuzumab-like is designed for use as an internal standard for quantitative analysis of Obinutuzumab in plasma samples. Obinutuzumab targets the CD20 protein and is used in hematology and inflammatory diseases.

Product features and protocols

Key features

- 1 Purity >95%
as determined by SDS-PAGE
- 2 Labelling Arg-¹³C₆, ¹⁵N₄ | Lys-¹³C₆, ¹⁵N₂
- 3 Isotopic incorporation >98%
as determined by LC-MS/MS
analysis of digested SIL-mAb

Other features

Expression System	CHO cells
Protein content	Quantitation is carried out by UV Absorbance at 280 nm
Formulation	5 mM Histidine-HCl pH 6.0 60 mM Trehalose 0.01% Polysorbate 20

Product preparation

We recommend the following steps:

1. Briefly centrifuge the tube before opening
2. Reconstitute by adding the appropriate volume of ultrapure water for a final concentration of 200 µg/ml (e.g. 50 µl for 10 µg or 250 µl for 50 µg)
3. Vortex gently to insure complete dissolution
4. Wait 15 minutes at room temperature before proceeding further
5. Vortex gently again and centrifuge briefly

Product storage

The product is lyophilized and shipped at ambient temperature. Store at -80 °C upon receipt. After reconstitution, the protein can be preserved at 4°C for a few weeks.

Avoid multiple freeze-thaw cycles

How to use our product

SIL mAbs are used as an internal standards by addition at the start of a sample preparation workflow. Both Labeled and target therapeutic mAbs will be processed throughout the entire analytical procedure controlling for variability caused by pre-analytical treatments or incomplete enzymatic digestion (1).

Supporting information

SDS-PAGE gel analysis of OBINUTUZUMAB-Like protein in non-reducing/ non heated conditions (NR/NH) Stained with Coomassie blue
