

Product name
Golimumab

Catalog number
SIU05281

Product description

Golimumab is a human monoclonal antibody used as an immunosuppressive medication. It is a TNF inhibitor and targets tumor necrosis factor alpha (TNF-alpha), a pro-inflammatory molecule. Used in treatment of moderately-to-severely active rheumatoid arthritis (RA), active psoriatic arthritis (PsA) and active ankylosing spondylitis (AS).

Product features and protocols

Key features

- 1** Purity >95%
as determined by SDS-PAGE
- 2** Labelling Arg-¹³C₆, ¹⁵N₄ | Lys-¹³C₆, ¹⁵N₂
- 3** Isotopic incorporation >98%
as determined by LC-MS/MS analysis of digested SIL-mAb

Other features

Expression System	CHO
Protein content	Quantitation is carried out by UV Absorbance at 280 nm
Formulation	Buffer: 5 mM Histidine pH6 ; 60 mM trehalose ; 0.01% Polysorbate 20.

Product preparation

For product preparation we recommend the following steps:

- Briefly centrifuge the tube before opening
- Reconstitute by adding the appropriate volume of ultrapure water for a final concentration of 200 µg/ml (e.g. 50 µl for 10 µg or 250 µl for 50 µg)
- Vortex gently to insure complete dissolution
- Wait 15 minutes at Room temperature before proceeding further
- Vortex gently again and centrifuge briefly

Product storage

The product is lyophilized and shipped at room temperature. **Store at -80 °C upon receipt.**

After reconstitution, the protein can be preserved at 4°C for a few weeks.

Avoid multiple freeze-thaw cycles

How to use our product

SIL mAbs allow to overcome the process variability since they are added at the very beginning of a sample preparation. This has positive impact on your analyte quantification, especially if the analyte interacts with other species commonly present within the matrix (1).

Supporting information

SDS-PAGE gel analysis of **Golimumab** protein in non-reducing/ non heated conditions (NR/NH)
Stained with Coomassie blue
